DETAILED ACTION

Allowable Subject Matter

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest an automated reactor-based water treatment system comprising a reactor with an inlet, structure for adding a treatment chemical to the water, structure for dynamically adjusting an output flow rate from the reactor, and a controller connected to the adjusting structure to dynamically control the residence time in the reactor to a predetermined length by receiving at least the inlet flow rate. The prior art also fails to disclose a method for treating water in an open-flow channel, comprising determining an inlet flow rate into the channel, adding a treatment chemical to the water, and automatically and dynamically adjusting an output flow rate based on at least the inlet flow rate to achieve a predetermined residence time in the channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed on the attached PTO-892 form disclose adjustable weirs and methods for controlling output flows in water treatment systems.
